Data to build business agility

Agile IQ®

by Zen Ex Machina

Agile IQ® Overview

One assessment
Instant results
$10M+ savings on your digital transformation

Unlike team surveys that are prone to response bias, Agile IQ® is based on predictive analytics and data modelling of over 1000+ successful, high performing agile teams.
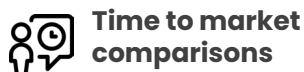

With one score, Agile IQ® will tell you:

- **How you compare to other companies** at a similar age in their transformation.
- Insights on **what other companies have done** to succeed.
- **What you need to do** to scale and repeat agile success.

Companies that have followed Agile IQ®'s data and insights have saved up to $10M/yr, doubled their throughput, and reduced time to market to as little as 3 weeks.

Compare your metrics to others and track you progress

Agile IQ® compares to you other companies of a similar age, not an industry average. This ensures its advice and real-world comparison metrics are customised to your context.

Cost savings modelling

Time to market comparisons

Throughput trends

Get insights based on your Agile IQ®

Agile IQ® and Agile IQ®: Transformation Academy™ provide up-to-date, industry aligned advice on how to use your Agile IQ® score to create scalable and repeatable outcomes for enterprise agility.

Curated advice

Over 100 curated articles, downloads, and templates from Scrum.org™ Professional Scrum Trainers™ aligned to your level of maturity for all types of teams, not just software.

Set goals, see trends and track improvements

Select improvements from Agile IQ®: Transformation Academy™ and add them to Agile IQ® goals so you can track improvements.

Integrate with Jira

Pull data from Jira and send improvement actions to plan and track improvement tasks Sprint-to-Sprint or on Agile IQ®'s web dashboard.

Our AI learns about you and others

Agile IQ® advice is generated by learning what makes others improve to help you repeat others outcomes.
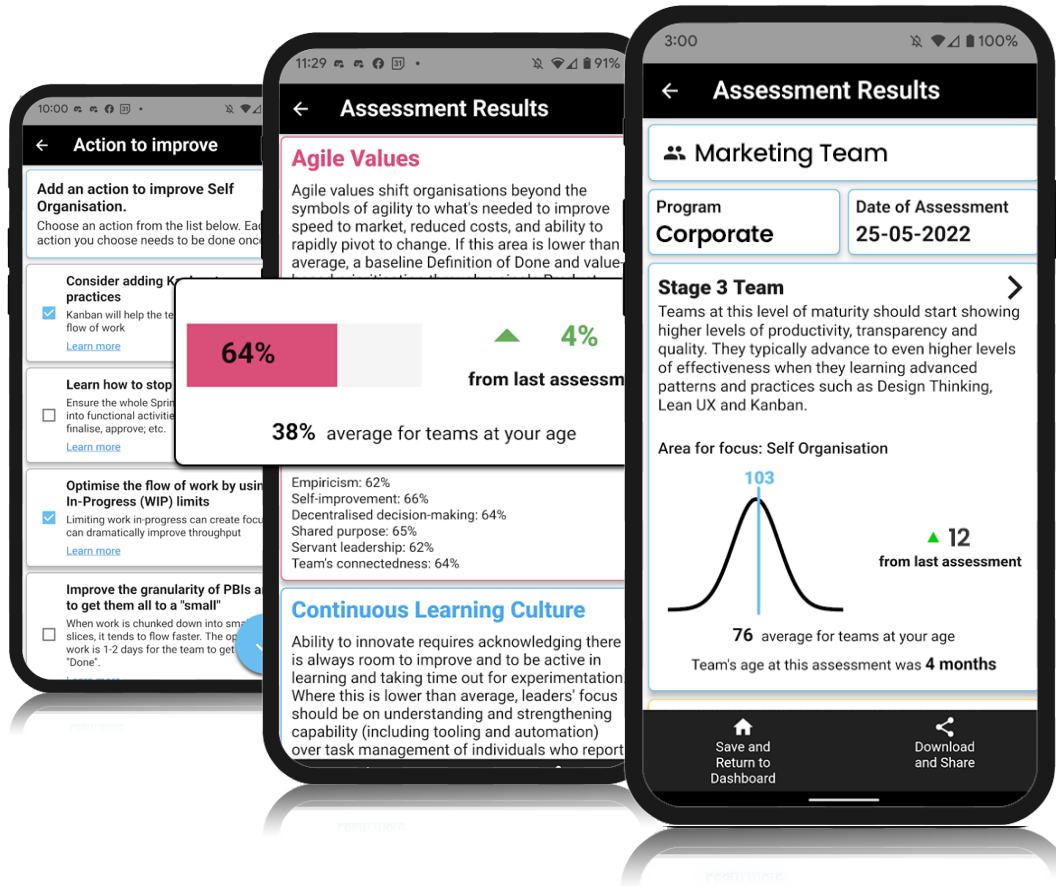

Maturity model to help you grow

Our behaviour-based, non-linear maturity model designed by Scrum.org™ Professional Scrum Trainers™ takes the guesswork out of reaping agile's outcomes.

Track your growing agile mindset

Compare and track your company's agile traits and behaviours to others of a similar age. Use data to make decisions on where to focus capability improvement.

Predictive analytics tells you what others have done and what you can do to repeat their success.

Its powerful AI helps Agile IQ® learn what makes other organisations agile. It provides you with insights to give clarity on the maturity of your digital transformation and what you need to do next with its 4 key success metrics.

Predictive analytics

Get insights on what to do next to scale your agility, not just static delivery metric, team happiness or velocity.

Curated advice

Over 100 curated articles, downloads, and templates from Professional Scrum Trainers™ aligned to your level of maturity for all types of teams, not just software.

Maturity model to help you grow

Our behaviour-based, non-linear maturity model designed by Scrum.org™ Professional Scrum Trainers™ takes the guesswork out of reaping agile's outcomes.

Empower team members to discover insights hidden in your data with Agile IQ®'s SQL API for Microsoft Power BI and Excel.

Agile IQ® enables everyone at every level of your organisation to make confident decisions using up-to-the-minute productivity analytics.
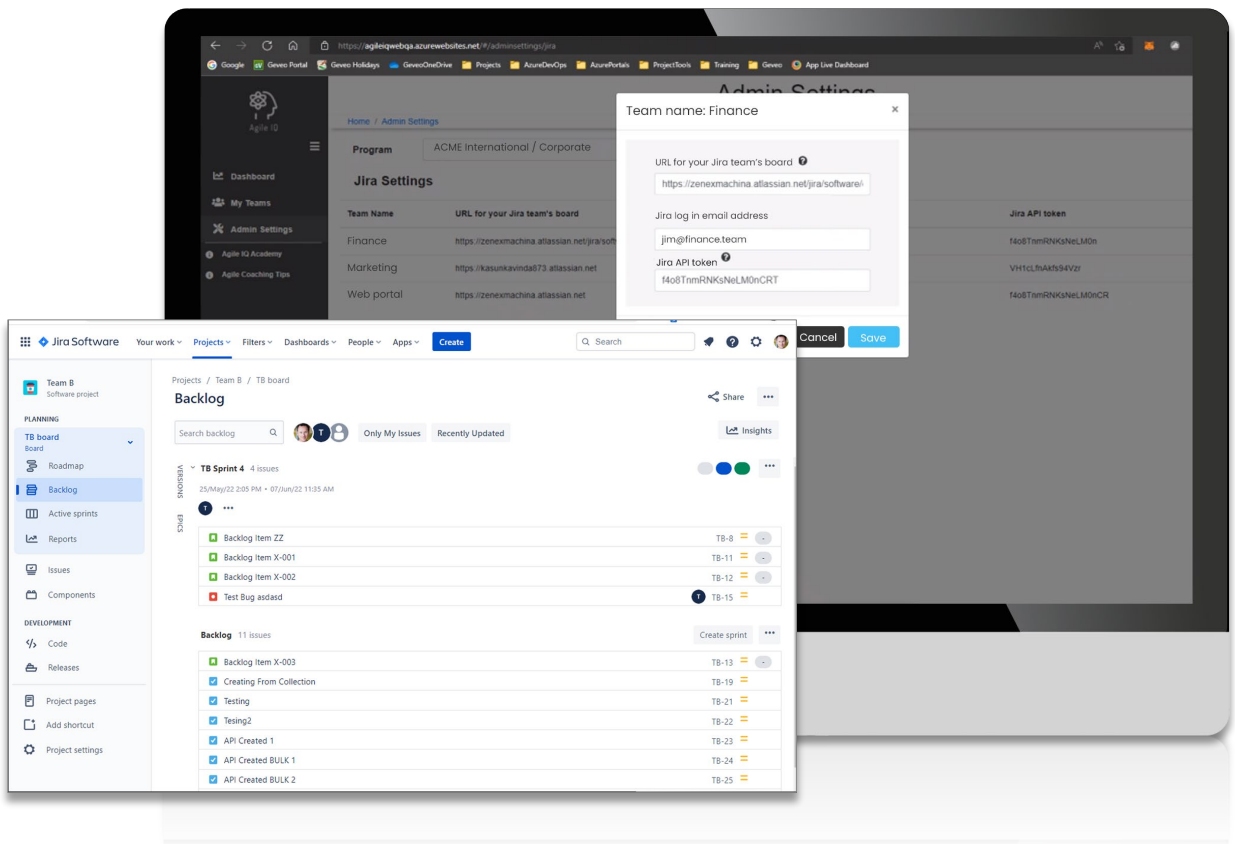

Self-service analytics at enterprise scale

Reduce the risks of multiple solutions with an analytics platform that scales from teams to the organisation as a whole.

Smarter tools for smarter organisations

Share meaningful insights with Power BI's data visualisations with Agile IQ® SQL connectors.

Get out of the weeds of velocity

Provide decision-makers with behavioural data based on predictive analytics not team happiness or velocity.

Pull data from Jira® to generate insights on lead time for change, throughput, and the health of your digital transformation.

Agile IQ® extracts your data, compares your digital transformation to others, and generates insights on where you should be focussing next.

Integrate with Jira

Pull data from Jira and send improvement actions to plan and track improvement tasks Sprint-to-Sprint or on Agile IQ®'s web dashboard.

Our AI learns about you and others

Agile IQ® advice is generated by learning what makes others improve to help you repeat others outcomes.

Maturity model to help you grow

Our behaviour-based, non-linear maturity model designed by Scrum.org™ Professional Scrum Trainers™ takes the guesswork out of reaping agile's outcomes.
